This conference explores the social positions of the Romani people, the nature of anti-Romani stereotypes, and Romani agency in relation to other ethno-racial projects. It brings together critical perspectives on Romani racial formations, ethnicity, membership, and belonging, moving beyond isolated and compartmentalised majority-minority approaches. Speakers will explore ways scholars can analyse Romani racialization as intimately related to other racial projects. They will examine historical interactions between Romani people and other ethno-racial communities, tracing transnational and intercultural connections, and investigating how Romani experiences have been shaped by broader social processes. Finally, presenters will consider how different social justice movements influence one another and explore the formation of alliances. In doing so, they will invite the reimagining of solidarity that goes beyond notions of racial or ethnic unity based on prior similarity, recognising instead heterogeneity and differential modes of exclusion and incorporation.

The conference is supported by the Czech Academy of Sciences' Lumina Quaeruntur Fellowship (project Romani Atlantic: Transcontinental Logic of Ethno-Racial Identities, LQ300582201) and Strategy AV21 - Identities in the World of Wars and Crises.
